SUMMARY

AI engineer and full-stack developer who ships LLM features into production. Main contributor to two client platforms at Hytel, where I built **multimodal Gemini product identification**, an **evaluation harness** to tune it, AI price suggestions, a grounded in-app AI assistant and privacy-safe AI observability. Strong across the stack (TypeScript, React, tRPC, Firebase, Google Cloud) with test-driven backend work, CI/CD and direct client communication. Cum Laude Computer Science graduate.

CERTIFICATIONS

HYTEL, 2026
RAG Application Specialist

GOOGLE CLOUD, 2026
Attention Mechanism

GOOGLE CLOUD, 2026
Encoder-Decoder Architecture

EF SET, 2025
English C2 Proficient, 74/100

SKILLS

AI and LLMs: Gemini, Vertex AI, Genkit, multimodal (vision) models, prompt engineering, structured output validation, RAG, LLM evaluation, AI observability, cost and latency tuning, transformer fundamentals

Languages: TypeScript, JavaScript, Python, Java, SQL, PHP

Frontend: React, Vite, Tailwind CSS, TanStack Query, responsive and accessible UI from Figma designs

Backend and cloud: Node.js, tRPC, Zod, Firebase (Firestore, Cloud Functions, Auth, Storage), Google Cloud, PostgreSQL, MySQL

Quality and delivery: Vitest, Playwright, TDD, GitHub Actions, Turborepo, Claude Code (multi-agent workflows, MCP)

EXPERIENCE

Hytel *AI Engineer | Full-Stack Developer* — Mar 2026 - Present

Reviva MAIN CONTRIBUTOR — Apr 2026 - Present

Resale and consignment marketplace with staff, seller and buyer portals, online shop and in-store till

AI FEATURES

- **Multimodal AI product identification** with Gemini on Vertex AI through Genkit: reads brand, category, colour, size and condition from item photos, label first, constrained to the shop's fixed vocabularies.
- **AI accuracy evaluation harness** (test-set reader, scorer and report), used to tune the token cap and thinking level for accuracy, latency and cost.
- **AI retail price suggestions** with timeouts, retries and plausibility checks on model output.
- **Grounded AI help assistant** in the email template editor, with rate limiting and prompt-injection hardening.
- **Privacy-safe AI observability:** a fail-open tracer that logs timing, model and token counts, never photos or personal data.
- **Reliable, efficient LLM calls:** schema checks on output, Gemini model migration, data-residency regions, and thinking-budget caps that cut virtual try-on latency and cost.

FULL-STACK AND CLIENT WORK

- **Payments and money flows** with Stripe (card and wallet checkout, Connect payouts), refunds, store credit and commission splits, plus eBay, shipping and email marketing integrations.
- **Releases and quality:** dev, stage and production deploys on Firebase and Google Cloud with GitHub Actions, a legacy data migration, test-driven backend (Vitest) and end-to-end checks (Playwright).
- **Direct client communication:** worked with the client week to week, turning their feedback and policy decisions into user stories, explaining releases in plain language and running live demos.

TMS MAIN CONTRIBUTOR — Mar 2026 - Jun 2026

Internal HR and operations platform: people, payroll, attendance, staffing and skills

- **Payroll and payslips:** mid-period salary changes, late, undertime and absence deductions.
- **Role-based access** for HR, manager, executive and admin users, plus the staffing planner, skills rubrics and leaderboard, attendance exports and cursor pagination.

Flinki FEATURE CONTRIBUTOR — Jun 2026

- **Direct messaging** (requests, blocking, age gate, real-time inbox) with push and email notifications and rate limiting.

AI TRAINING

Hytel AI Enablement Program 2026
RAG final project, plus a capstone designing a permission-aware enterprise RAG assistant (architecture, decision records, cost model, client readout).

EDUCATION

BS Computer Science
Cum Laude, 2021 - 2025
Emilio Aguinaldo College, Cavite

EARLIER EXPERIENCE

Rate Programmer, 2025
Quadrant Information Services

Software Developer (OJT), 2024
Village Gourmet Co. Inc.
